-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 01 May 2009.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**DETAILED ACTION**

***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1, 6, 7 and 11-13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Harrell et al. US 4,839,412 in view of Hall US 6,025,422 and further in view of Mehrer US 7,297,734 .

3. The rejection set forth under 35 USC 103 as set forth in the rejection mailed 2/3/09 over Harrell and Hall is basically repeated. Applicants newly amended claims and remarks filed in support thereof have been fully considered but have been found not persuasive.

4. Applicants have amended the claims so as to specify species of flame retardants and polyethylene resins. These species are found in the art as cited in the final rejection. The claim further recites the species of antioxidant as a thioester and requires a metal deactivator.

5. The thioester is a known conventional antioxidant. Both Harrell and Hall call for conventional antioxidants and stabilizers, Harrell at column 3 lines 40-45 and Hall at column 7 lines 6-20. The fact that these patent exemplify the Irganox 1010 does not render other conventional antioxidants patentable. To the contrary, the disclosure of the prior art is not limited to the examples but must be understood for what it fairly teaches.

Here, conventional antioxidants and stabilizers are suggested. The Mehrer patent is cited as showing the conventionality of the metal deactivators and thioesters in polyolefinic and polyethylene compositions, see column 17 lines 45-55, column 7 line 63 to column 8 line 15 and column 19 lines 13-15. It would be prima facie obvious to incorporate the thioester and metal deactivator as shown in Mehrer in the compositions of Harrell and Hall given the appreciation of the desired properties resultant therefrom.
